LEARNING ACTIVITY RECORD · GENERATED FROM COURSEDUP PLATFORM DATA

TERM REPORT · FALL 2026–27

Learning Analytics for Student

Daniel Okafor

PROGRAMME	DEPARTMENT	SCHOOL
Electrical and Electronics Engineering	Electrical and Electronics Engineering	Science and Engineering
UNIVERSITY	**LEARNER ID**	**REPORTING SCOPE**
Virtual Earth University	f47dd299	Fall 2026–27
RECORD PERIOD	**COURSES IN SCOPE**	**DATA SNAPSHOT**
21 Sep 2026 – 10 Jan 2027	5 courses · 1 term	13 Oct 2026

73
REFLECTIONS
one-sentence summaries and muddiest points written by the learner

38
ACTIVITIES
distinct learning activities in the learner's course weeks

41
SKILLS
distinct skills declared by the course syllabi

12
CREDENTIALS
distinct micro-credential pathways named by the syllabi

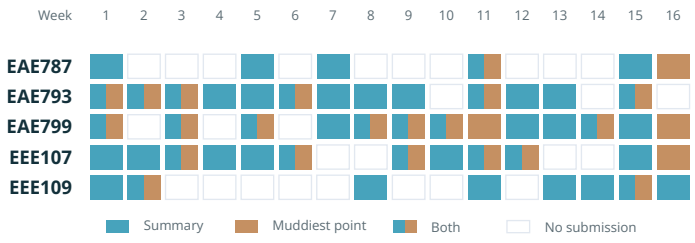

1 Courses enrolled this term

Courses the learner was enrolled in on CoursedUp, grouped by term. **Weeks with a reflection** counts the course weeks in which the learner submitted a one-sentence summary or a muddiest point.

Code	Course	Instructor	Weeks w/ reflection
EAE787	**Circuit Theory II**	Jayden Black	6 / 16
EAE793	**Electrical Engineering Laboratory I**	Lydia Jackson	13 / 16
EAE799	**Engineering Mathematics I**	Jayden Black	13 / 16
EEE107	**Electronics I**	Jayden Black	12 / 16
EEE109	**Electromagnetic Fields**	Thomas Hunt	8 / 16

2 Weekly reflection map

Each cell is one published course week. A cell is filled when the learner submitted a reflection that week: teal = one-sentence summary, amber = muddiest point, both colours = both. Empty cells are weeks without a submission — silence on the platform, not absence from class. Weeks in which the course published no post are left blank.

3 Activities recorded in the learner's course weeks

On CoursedUp each weekly course post carries the activities the instructor used that week, chosen from the platform's activity catalogue (Basic / Advanced / Innovative is the catalogue's own classification of the activity; T / E / A marks its role as teaching, engagement or assessment). The table lists **learning activities**: things the learner does, makes, discusses, analyses or presents, or meets outside experts and real settings through. Course documents such as the syllabus, lecture formats, platform tools, grading arrangements and standard exams or quizzes are part of the course record too, but are not listed. **Count** is the number of the learner's 80 course weeks in which the instructor recorded that activity. Attendance is not recorded by the platform.

38 distinct learning activities across 115 activity records · the 14 most frequent listed below

Activity	Role	Level	Count
Discussion Forums	T/E/A	Advanced	7
Simulations	T/E/A	Advanced	6
Think-Pair-Share	E/A	Advanced, Innovative	6
Tutorial Sessions	T/E	Advanced	6
Collaborative Study Sessions	T/E	Innovative	6
Real-World Cases	T/E/A	Basic, Advanced	6
Challenge Problems	E/A	Advanced, Innovative	5
Lab Report	T/E/A	Advanced	5
Mathematical Proofs	T/A	Advanced	5
Open Discussions	T/E	Advanced	4
Concept Maps	T/E/A	Basic, Advanced	4
Group Discussions	T/E	Advanced	4
Lab Projects	T/E/A	Basic, Advanced	4
Group Exercises	T/E/A	Advanced	3

Showing the 14 most frequent learning activities; 24 further learning activities were recorded less often. 26 further recorded items (course documents, lecture formats, tools, grading arrangements, standard exams and quizzes) are not listed.

4 Skills declared in the course syllabi

Each syllabus lists the skills its course targets. This section reproduces those *declarations* across the learner's courses, with the courses that declare each skill. It describes what the courses set out to teach; it does not assess whether a skill was acquired.

41 distinct skills from 44 syllabus entries · 26 hard, 7 soft, 8 meta

A. Technical and domain skills (Hard Skills)

Skill (as declared)	Courses
Circuit Analysis	EAE793
Calculus Proficiency	EAE799
BJT Biasing and AC Analysis	EEE107
Digital Logic Design	EAE793
Diode Circuit Design	EEE107
Instrumentation Usage	EAE793
Mathematical Modelling	EAE799
Operational Amplifier Applications	EEE107
RF and Transmission Line Analysis	EEE109
Semiconductor Physics Analysis	EEE107

16 further hard skills are declared in single courses; ordering: number of courses that declare the skill.

B. Interpersonal, communication and leadership skills (Soft Skills)

Skill (as declared)	Courses
Collaborative Problem Solving	EAE787, EAE793, EEE107, EEE109
Peer Collaboration	EAE799
Problem-Solving	EAE799
Engineering Judgment	EAE787
Technical Report Writing	EEE109
Technical Reporting	EAE793
Problem Formulation	EEE109

C. Thinking and self-regulation skills (Meta-Skills)

Skill (as declared)	Courses
Critical Thinking in RF Design	EEE109
Strategic Learning	EAE799
Computational Modeling	EEE109
Data Interpretation	EAE793
Evidence-Based Study Habit Formation	EAE787
Technical Project Management	EEE107
Experimental Troubleshooting	EAE793
Strategic Method Selection	EAE787

5 Micro-credential pathways named in the course syllabi

Course syllabi on CoursedUp name the micro-credential pathways their weekly topics are aligned with. The table reproduces those declarations for the learner's courses and shows, for the aligned weeks, how many carry a reflection by the learner. No credential is awarded or verified by this record; whether a pathway leads to a credential is decided by the awarding body, not by the platform.

12 distinct pathways named across 5 courses

Pathway (as declared)	Course	Weeks w/ reflection	Depth	Dimensions named
Advanced Circuit Analysis Specialist	EAE787	3 / 7	Mastery	Application
Systems Modeling & Design Practitioner	EAE787	1 / 5	Proficiency	Integration
Applied Circuit Analysis Specialist	EAE793	4 / 4	Proficiency	Application
Digital Systems Fundamentals	EAE793	2 / 2	Awareness	Application
Electronic Instrumentation Technician	EAE793	2 / 2	Mastery	Foundational Knowledge
Engineering Calculus Foundations	EAE799	5 / 6	Proficiency	Application
Mathematical Modelling for Systems	EAE799	2 / 2	Mastery	Integration
Analog Circuit Design Specialist	EEE107	10 / 12	Proficiency	Foundational Knowledge, Application, Integration
Power and Signal Electronics Practitioner	EEE107	4 / 6	Mastery	Application, Integration, Human Dimension
RF and Wave Propagation Expert	EEE109	4 / 6	Mastery	Integration
Applied Electromagnetic Foundations	EEE109	2 / 4	Proficiency	Foundational Knowledge
Computational Electromagnetics Specialist	EEE109	1 / 2	Proficiency	Application

6 The learner's reflections

Everything in this section was written by the learner on the platform and is quoted verbatim. Across the record period the learner submitted 48 one-sentence summaries, 25 muddiest points and 8 post comments, and marked 48 weekly posts as liked. Selection rule: for each course, the longest summary and the longest muddiest point (earliest week on a tie). Length is a transparent proxy for elaboration, not a quality judgement.

EAE787 · Circuit Theory II Fall 2026–27

Summary · W1· Advanced AC Circuit Review: Phasors, Complex Power, and Course Orientation

"Complex power allows for a complete accounting of energy flow by treating real and reactive power as orthogonal components in the complex plane."

Muddiest point · W11· Ideal and Practical Filters

"Determining the exact transition band width where the magnitude response deviates from the ideal brick-wall slope remains difficult for my analysis."

EAE793 · Electrical Engineering Laboratory I Fall 2026–27

Summary · W7· Mid-Semester Integrated Laboratory Review and Problem-Solving

"Consolidating measurement and analysis techniques reveals how systematic troubleshooting connects seemingly disparate circuit behaviors into a single framework."

Muddiest point · W3· Ohm's Law, Basic Circuit Construction, and Verification of Linear Relationships

"My difficulty lies in the variance between the calculated slope of the IV curve and the actual multimeter readings because I struggle to isolate probe resistance."

EAE799 · Engineering Mathematics I Fall 2026–27

Summary · W12· Mathematical applications in electrical engineering problem contexts

"Applying derivatives and integrals to circuit analysis confirms that mathematical models are required to describe real-time electrical system behavior."

Muddiest point · W9· Integration and accumulation

"The conceptual step from summing finite rectangles to taking the limit of an infinite series confuses my understanding of how area relates to accumulation."

EEE107 · Electronics I Fall 2026–27

Summary · W1· Introduction to Electronics and Semiconductor Fundamentals

"The PN junction functions because the depletion region creates a potential barrier that restricts charge carrier movement until an external bias is applied."

Muddiest point · W11· Op-Amp Applications: Integrators, Differentiators, and Comparator Circuits

"I find the phase shift in differentiators confusing when the input frequency approaches the corner frequency because my circuit output deviates from the ideal slope."

EEE109 · Electromagnetic Fields Fall 2026–27

Summary · W11· Maxwell's Equations (Integral Form) & Poynting Vector

"The Poynting vector demonstrates that electromagnetic energy propagates through the surrounding fields rather than the conductors themselves."

Muddiest point · W2· Coulomb's Law, Electric Field Intensity, and Field Superposition

"My confusion stems from the integration of continuous charge distributions because I struggle to determine the correct differential element relative to the observation point."

About this record

What it is. A summary of this learner's activity on the CoursedUp platform, generated automatically on 13 Oct 2026 from a platform data snapshot dated 13 Oct 2026. Every number is a count over platform records; every quotation is the learner's own text, unedited. No generative AI was used to produce any part of it, and no person reviewed it.

What it is not. It is not a transcript, a diploma supplement or a certificate. It contains no grades or credits, and it does not verify, certify or attest that any skill, competency or credential was attained. Sections 4 and 5 reproduce what course syllabi declare about the *design* of the courses; they say nothing about the learner's mastery. Section 3 reproduces the activities instructors recorded for their weekly posts; attendance is not tracked.

Definitions. *Weeks with a reflection*: course weeks in which the learner submitted a one-sentence summary or a muddiest point (52 of 80); comments and likes are not counted. *Reflections*: the learner's one-sentence summaries and muddiest points added together. *Learning activities*: catalogue activities in which the learner does, makes, discusses, analyses or presents something, or meets outside experts and real settings; course documents, lecture formats, platform tools, grading arrangements and standard exams or quizzes are excluded, by one classification of the platform's activity catalogue applied identically to every record. *Distinct*: counted once however many courses declare it, after normalising spelling (case, hyphens, "&"); no synonyms are merged.

Questions. About the content of a course: its instructor. About this record or the underlying data: CoursedUp support. The learner can request the full list of their submissions at any time.
