LEARNING ACTIVITY RECORD · GENERATED FROM COURSEDUP PLATFORM DATA

TERM REPORT · FALL 2026–27

Learning Analytics for Student

Kai Nakamura

PROGRAMME	DEPARTMENT	SCHOOL
Computer Engineering	Computer Engineering	Science and Engineering
UNIVERSITY	**LEARNER ID**	**REPORTING SCOPE**
Virtual Earth University	6965a100	Fall 2026–27
RECORD PERIOD	**COURSES IN SCOPE**	**DATA SNAPSHOT**
21 Sep 2026 – 10 Jan 2027	5 courses · 1 term	13 Oct 2026

90
REFLECTIONS
one-sentence summaries and muddiest points written by the learner

46
ACTIVITIES
distinct learning activities in the learner's course weeks

33
SKILLS
distinct skills declared by the course syllabi

11
CREDENTIALS
distinct micro-credential pathways named by the syllabi

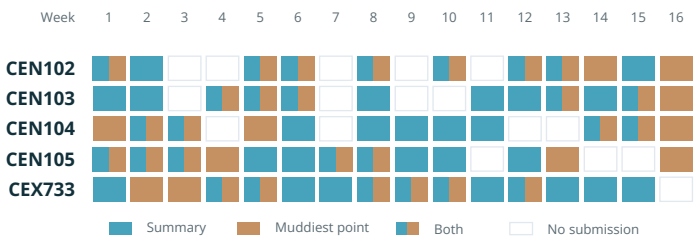

1 Courses enrolled this term

Courses the learner was enrolled in on CoursedUp, grouped by term. **Weeks with a reflection** counts the course weeks in which the learner submitted a one-sentence summary or a muddiest point.

Code	Course	Instructor	Weeks w/ reflection
CEN102	**Programming Fundamentals**	Veronica Bowman	11 / 16
CEN103	**Digital Logic Design**	Wendy Rice	12 / 16
CEN104	**Circuit Analysis**	Diana Foster	12 / 16
CEN105	**Discrete Mathematics**	Wendy Rice	13 / 16
CEX733	**Linear Algebra**	Daniel Burton	15 / 16

2 Weekly reflection map

Each cell is one published course week. A cell is filled when the learner submitted a reflection that week: teal = one-sentence summary, amber = muddiest point, both colours = both. Empty cells are weeks without a submission — silence on the platform, not absence from class. Weeks in which the course published no post are left blank.

3 Activities recorded in the learner's course weeks

On CoursedUp each weekly course post carries the activities the instructor used that week, chosen from the platform's activity catalogue (Basic / Advanced / Innovative is the catalogue's own classification of the activity; T / E / A marks its role as teaching, engagement or assessment). The table lists **learning activities**: things the learner does, makes, discusses, analyses or presents, or meets outside experts and real settings through. Course documents such as the syllabus, lecture formats, platform tools, grading arrangements and standard exams or quizzes are part of the course record too, but are not listed. **Count** is the number of the learner's 80 course weeks in which the instructor recorded that activity. Attendance is not recorded by the platform.

46 distinct learning activities across 118 activity records · the 14 most frequent listed below

Activity	Role	Level	Count
Concept Maps	T/E/A	Basic, Advanced	7
Think-Pair-Share	E/A	Advanced, Innovative	7
Challenge Problems	E/A	Advanced, Innovative	6
Real-World Cases	T/E/A	Basic, Advanced	6
Tutorial Sessions	T/E	Advanced	6
Mathematical Proofs	T/A	Advanced	6
Peer Learning	T/E	Advanced	4
Recitation Sessions	T/E	Advanced	4
Simulations	T/E/A	Advanced	4
Collaborative Study Sessions	T/E	Innovative	4
Flow Charts	T	Advanced	4
Live Coding	E/A	Advanced, Innovative	4
Case Study	T/E/A	Advanced	3
Group Discussions	T/E	Advanced	3

Showing the 14 most frequent learning activities; 32 further learning activities were recorded less often. 31 further recorded items (course documents, lecture formats, tools, grading arrangements, standard exams and quizzes) are not listed.

4 Skills declared in the course syllabi

Each syllabus lists the skills its course targets. This section reproduces those *declarations* across the learner's courses, with the courses that declare each skill. It describes what the courses set out to teach; it does not assess whether a skill was acquired.

33 distinct skills from 35 syllabus entries · 19 hard, 8 soft, 6 meta

A. Technical and domain skills (Hard Skills)

Skill (as declared)	Courses
Matrix Algebra	CEX733
Circuit Design & Optimization	CEN103
Circuit Modeling	CEN104
Dimensionality Reduction (PCA)	CEX733
Mathematical Proofing	CEX733
Network Modeling	CEN105
Troubleshooting	CEN104
Sequential Logic Analysis	CEN103
Algorithmic Logic	CEN102
Boolean Algebra Simplification	CEN103

9 further hard skills are declared in single courses; ordering: number of courses that declare the skill.

B. Interpersonal, communication and leadership skills (Soft Skills)

Skill (as declared)	Courses
Collaborative Problem Solving	CEN104, CEX733
Technical Communication	CEN104, CEX733
Analytical Problem Solving	CEN105
Problem-Solving	CEN103
Collaborative Coding	CEN102
Collaborative Design	CEN103
Collaborative Technical Communication	CEN105
Problem Decomposition	CEN102

C. Thinking and self-regulation skills (Meta-Skills)

Skill (as declared)	Courses
Abstract Modeling	CEX733
Algorithmic Thinking	CEN104
Self-Directed Learning	CEN104
Systematic Design Methodology	CEN103
Computational Thinking	CEN105
Metacognition	CEN102

5 Micro-credential pathways named in the course syllabi

Course syllabi on CoursedUp name the micro-credential pathways their weekly topics are aligned with. The table reproduces those declarations for the learner's courses and shows, for the aligned weeks, how many carry a reflection by the learner. No credential is awarded or verified by this record; whether a pathway leads to a credential is decided by the awarding body, not by the platform.

11 distinct pathways named across 5 courses

Pathway (as declared)	Course	Weeks w/ reflection	Depth	Dimensions named
Foundational Software Engineering	CEN102	4 / 7	Proficiency	Application
Object-Oriented Programming Specialist	CEN102	1 / 2	Proficiency	Integration
Software Quality Assurance Associate	CEN102	1 / 2	Awareness	Application
Embedded Hardware Designer	CEN103	7 / 10	Mastery	Application
Digital Logic Foundations Specialist	CEN103	3 / 4	Proficiency	Foundational Knowledge
Advanced Network Systems Designer	CEN104	6 / 8	Mastery	Integration
Applied Circuit Analysis Specialist	CEN104	5 / 7	Proficiency	Application
Applied Graph Theory & Network Analysis	CEN105	3 / 3	Mastery	Application
Foundations of Computational Logic	CEN105	1 / 2	Proficiency	Foundational Knowledge
Mathematical Foundations of Engineering	CEX733	7 / 7	Mastery	Foundational Knowledge
Applied Linear Algebra for Data Science	CEX733	6 / 6	Proficiency	Application

6 The learner's reflections

Everything in this section was written by the learner on the platform and is quoted verbatim. Across the record period the learner submitted 52 one-sentence summaries, 38 muddiest points and 2 post comments, and marked 52 weekly posts as liked. Selection rule: for each course, the longest summary and the longest muddiest point (earliest week on a tie). Length is a transparent proxy for elaboration, not a quality judgement.

CEN102 · Programming Fundamentals Fall 2026–27

Summary · W5· Operators, expressions, and precedence rules

"Operator precedence dictates the specific order of evaluation, which effectively governs how expressions resolve into singular values during calculation."

Muddiest point · W16· Final Exam

"The exact boundary where memory allocation for objects persists through recursive depth during an error event still feels shaky to me in a high pressure environment."

CEN103 · Digital Logic Design Fall 2026–27

Summary · W13· Programmable logic, design abstraction, and hardware implementation strategies

"Hardware description languages allow designers to specify digital behavior through concurrent code structures that compile into physical gate implementations."

Muddiest point · W5· Canonical forms, Karnaugh maps, and logic minimization

"Mapping variables correctly into the K-map grid is still difficult for me when the input count reaches four or more, as the wrap-around adjacencies confuse me."

CEN104 · Circuit Analysis Fall 2026–27

Summary · W9· Capacitors, Inductors, and Energy Storage in Circuits

"Energy storage occurs because inductors prevent instantaneous current changes and capacitors prevent instantaneous voltage changes through their constitutive laws."

Muddiest point · W5· Node-Voltage Method

"My difficulty lies in handling dependent sources within the nodal equations because I keep forgetting to include the control variable constraint in the final matrix setup."

CEN105 · Discrete Mathematics Fall 2026–27

Summary · W12· Counting with generating ideas, pigeonhole principle, and introductory recurrence applications

"Non-constructive existence proofs rely on the pigeonhole principle to confirm that at least one subset must satisfy a property without finding it."

Muddiest point · W4· Sets, set operations, and Venn diagrams

"The boundary between symmetric difference and basic set difference remains unclear because I struggle to visualize which elements the exclusive-or operation removes."

CEX733 · Linear Algebra Fall 2026–27

Summary · W15· Comprehensive review and final exam preparation

"Singular value decomposition offers a universal factorization for any rectangular matrix, extending the utility of spectral analysis to non-square systems."

Muddiest point · W2· Matrix algebra and computational operations

"The pivot selection process during partial pivoting remains tricky for me because I struggle to track how row swaps influence the determinant sign consistently."

About this record

What it is. A summary of this learner's activity on the CoursedUp platform, generated automatically on 13 Oct 2026 from a platform data snapshot dated 13 Oct 2026. Every number is a count over platform records; every quotation is the learner's own text, unedited. No generative AI was used to produce any part of it, and no person reviewed it.

What it is not. It is not a transcript, a diploma supplement or a certificate. It contains no grades or credits, and it does not verify, certify or attest that any skill, competency or credential was attained. Sections 4 and 5 reproduce what course syllabi declare about the *design* of the courses; they say nothing about the learner's mastery. Section 3 reproduces the activities instructors recorded for their weekly posts; attendance is not tracked.

Definitions. *Weeks with a reflection*: course weeks in which the learner submitted a one-sentence summary or a muddiest point (63 of 80); comments and likes are not counted. *Reflections*: the learner's one-sentence summaries and muddiest points added together. *Learning activities*: catalogue activities in which the learner does, makes, discusses, analyses or presents something, or meets outside experts and real settings; course documents, lecture formats, platform tools, grading arrangements and standard exams or quizzes are excluded, by one classification of the platform's activity catalogue applied identically to every record. *Distinct*: counted once however many courses declare it, after normalising spelling (case, hyphens, "&"); no synonyms are merged.

Questions. About the content of a course: its instructor. About this record or the underlying data: CoursedUp support. The learner can request the full list of their submissions at any time.
