2 Weekly reflection map

Each cell is one published course week. A cell is filled when the learner submitted a reflection that week: teal = one-sentence summary, amber = muddiest point, both colours = both. Empty cells are weeks without a submission — silence on the platform, not absence from class. Weeks in which the course published no post are left blank.

3 Activities recorded in the learner's course weeks

On CoursedUp each weekly course post carries the activities the instructor used that week, chosen from the platform's activity catalogue (Basic / Advanced / Innovative is the catalogue's own classification of the activity; T / E / A marks its role as teaching, engagement or assessment). The table lists **learning activities**: things the learner does, makes, discusses, analyses or presents, or meets outside experts and real settings through. Course documents such as the syllabus, lecture formats, platform tools, grading arrangements and standard exams or quizzes are part of the course record too, but are not listed. **Count** is the number of the learner's 80 course weeks in which the instructor recorded that activity. Attendance is not recorded by the platform.

5 Micro-credential pathways named in the course syllabi

Course syllabi on CoursedUp name the micro-credential pathways their weekly topics are aligned with. The table reproduces those declarations for the learner's courses and shows, for the aligned weeks, how many carry a reflection by the learner. No credential is awarded or verified by this record; whether a pathway leads to a credential is decided by the awarding body, not by the platform.

6 The learner's reflections

Everything in this section was written by the learner on the platform and is quoted verbatim. Across the record period the learner submitted 53 one-sentence summaries, 32 muddiest points and 4 post comments, and marked 53 weekly posts as liked. Selection rule: for each course, the longest summary and the longest muddiest point (earliest week on a tie). Length is a transparent proxy for elaboration, not a quality judgement.

About this record

What it is. A summary of this learner's activity on the CoursedUp platform, generated automatically on 13 Oct 2026 from a platform data snapshot dated 13 Oct 2026. Every number is a count over platform records; every quotation is the learner's own text, unedited. No generative AI was used to produce any part of it, and no person reviewed it.

What it is not. It is not a transcript, a diploma supplement or a certificate. It contains no grades or credits, and it does not verify, certify or attest that any skill, competency or credential was attained. Sections 4 and 5 reproduce what course syllabi declare about the *design* of the courses; they say nothing about the learner's mastery. Section 3 reproduces the activities instructors recorded for their weekly posts; attendance is not tracked.

Definitions. *Weeks with a reflection*: course weeks in which the learner submitted a one-sentence summary or a muddiest point (59 of 80); comments and likes are not counted. *Reflections*: the learner's one-sentence summaries and muddiest points added together. *Learning activities*: catalogue activities in which the learner does, makes, discusses, analyses or presents something, or meets outside experts and real settings; course documents, lecture formats, platform tools, grading arrangements and standard exams or quizzes are excluded, by one classification of the platform's activity catalogue applied identically to every record. *Distinct*: counted once however many courses declare it, after normalising spelling (case, hyphens, "&"); no synonyms are merged.

Questions. About the content of a course: its instructor. About this record or the underlying data: CoursedUp support. The learner can request the full list of their submissions at any time.
