LEARNING ACTIVITY RECORD · GENERATED FROM COURSEDUP PLATFORM DATA

TERM REPORT · SPRING 2026–27

Learning Analytics for Student

Sofia Marchetti

PROGRAMME	DEPARTMENT	SCHOOL
Mechanical Engineering	Mechanical Engineering	Science and Engineering
UNIVERSITY	**LEARNER ID**	**REPORTING SCOPE**
Virtual Earth University	ebe5e12e	Spring 2026–27
RECORD PERIOD	**COURSES IN SCOPE**	**DATA SNAPSHOT**
25 Jan 2027 – 16 May 2027	5 courses · 1 term	13 Oct 2026

85
REFLECTIONS
one-sentence summaries and muddiest points written by the learner

35
ACTIVITIES
distinct learning activities in the learner's course weeks

107
SKILLS
distinct skills declared by the course syllabi

17
CREDENTIALS
distinct micro-credential pathways named by the syllabi

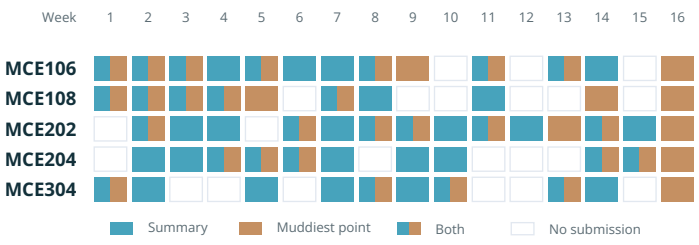

1 Courses enrolled this term

Courses the learner was enrolled in on CoursedUp, grouped by term. **Weeks with a reflection** counts the course weeks in which the learner submitted a one-sentence summary or a muddiest point.

Code	Course	Instructor	Weeks w/ reflection
MCE106	**Calculus II**	Jordan Hill	13 / 16
MCE108	**Engineering Graphics**	Gianna Brooks	10 / 16
MCE202	**Dynamics**	Leonardo Gonzalez	14 / 16
MCE204	**Strength of Materials**	Leonardo Gonzalez	11 / 16
MCE304	**Manufacturing Processes**	Ezra Smith	10 / 16

2 Weekly reflection map

Each cell is one published course week. A cell is filled when the learner submitted a reflection that week: teal = one-sentence summary, amber = muddiest point, both colours = both. Empty cells are weeks without a submission — silence on the platform, not absence from class. Weeks in which the course published no post are left blank.

3 Activities recorded in the learner's course weeks

On CoursedUp each weekly course post carries the activities the instructor used that week, chosen from the platform's activity catalogue (Basic / Advanced / Innovative is the catalogue's own classification of the activity; T / E / A marks its role as teaching, engagement or assessment). The table lists **learning activities**: things the learner does, makes, discusses, analyses or presents, or meets outside experts and real settings through. Course documents such as the syllabus, lecture formats, platform tools, grading arrangements and standard exams or quizzes are part of the course record too, but are not listed. **Count** is the number of the learner's 80 course weeks in which the instructor recorded that activity. Attendance is not recorded by the platform.

35 distinct learning activities across 108 activity records · the 14 most frequent listed below

Activity	Role	Level	Count
Simulations	T/E/A	Advanced	12
Discussion Forums	T/E/A	Advanced	9
Real-World Cases	T/E/A	Basic, Advanced	9
Lab Sessions	T/E	Advanced	9
Collaborative Study Sessions	T/E	Innovative	7
Group Exercises	T/E/A	Advanced	6
Recitation Sessions	T/E	Advanced	4
Challenge Problems	E/A	Advanced, Innovative	4
Group Projects	E/A	Advanced	3
Lab Exercises	E/A	Basic, Advanced	3
Lab Projects	T/E/A	Basic, Advanced	3
Tutorial Sessions	T/E	Advanced	3
Mathematical Proofs	T/A	Advanced	3
Area Specific Software	T/E/A	Basic, Advanced	2

Showing the 14 most frequent learning activities; 21 further learning activities were recorded less often. 14 further recorded items (course documents, lecture formats, tools, grading arrangements, standard exams and quizzes) are not listed.

4 Skills declared in the course syllabi

Each syllabus lists the skills its course targets. This section reproduces those *declarations* across the learner's courses, with the courses that declare each skill. It describes what the courses set out to teach; it does not assess whether a skill was acquired.

107 distinct skills from 107 syllabus entries · 81 hard, 10 soft, 16 meta

A. Technical and domain skills (Hard Skills)

Skill (as declared)	Courses
Kinetic Equations Formulation (newton, Work-Energy, Impulse-Momentum)	MCE202
3D Spatial Orientation and Tensor Mechanics	MCE202
Kinematic Analysis of Particles and Rigid Bodies	MCE202
Parametric and Polar Calculus	MCE106
Identifying Critical Locations for Stress Concentrations	MCE204
Joining and Assembly Design	MCE304
Orthographic Projection	MCE108
Partial Fractions	MCE106
Vibration and Resonance Analysis	MCE202
Volume and Area Calculation	MCE106

71 further hard skills are declared in single courses; ordering: number of courses that declare the skill.

B. Interpersonal, communication and leadership skills (Soft Skills)

Skill (as declared)	Courses
Analytical Problem Solving	MCE106
Peer Instruction and Communication	MCE202
Collaborative Problem Solving	MCE202
Peer Collaboration	MCE106
Project Presentation	MCE108
Teamwork and Group Collaboration	MCE304
Technical Communication and Research	MCE304
Collaboration and Teamwork	MCE108
Ensuring Safety and Reliability	MCE204

1 further soft skills are declared in single courses; ordering: number of courses that declare the skill.

C. Thinking and self-regulation skills (Meta-Skills)

Skill (as declared)	Courses
Simulation and Software-Based Engineering Analysis	MCE202
Strategic Method Selection	MCE106
Systems Thinking and Complex Case Synthesis	MCE202
Mathematical Modeling	MCE106
Spatial Reasoning	MCE108
Critical Thinking	MCE204
Critical Thinking and Problem Solving	MCE304
Integrated Understanding	MCE204

8 further meta-skills are declared in single courses; ordering: number of courses that declare the skill.

5 Micro-credential pathways named in the course syllabi

Course syllabi on CoursedUp name the micro-credential pathways their weekly topics are aligned with. The table reproduces those declarations for the learner's courses and shows, for the aligned weeks, how many carry a reflection by the learner. No credential is awarded or verified by this record; whether a pathway leads to a credential is decided by the awarding body, not by the platform.

17 distinct pathways named across 5 courses · the 16 with the most aligned weeks are shown

Pathway (as declared)	Course	Weeks w/ reflection	Depth	Dimensions named
Advanced Integration Specialist	MCE106	3 / 3	Proficiency	Foundational Knowledge, Application
Engineering Geometry Modeler	MCE106	3 / 3	Proficiency	Application, Integration
Advanced Functions & Parametric Modeler	MCE106	2 / 3	Mastery	Application, Integration, Learning How to Learn
Infinite Series Analyst	MCE106	2 / 3	Proficiency	Foundational Knowledge, Application
Technical Drawing and GD&T Practitioner	MCE108	7 / 9	Mastery	Foundational Knowledge
Certified CAD and 3D Modeling Specialist	MCE108	1 / 4	Proficiency	Application
DFM and Reverse Engineering Analyst	MCE108	1 / 2	Proficiency	Integration
Advanced Mechanical Dynamics Specialist	MCE202	7 / 9	Proficiency	Foundational Knowledge, Application, Integration
Spatial Mechanics and Vibration Analyst	MCE202	5 / 5	Mastery	Application, Integration, Learning How to Learn
Beam & Shaft Mechanics Professional	MCE204	4 / 4	Proficiency	Foundational Knowledge, Application, Integration
Structural Integrity & Failure Prevention Engineer	MCE204	1 / 4	Mastery	Application, Integration, Evaluation, Caring
Advanced Structural Analysis Expert	MCE204	2 / 3	Mastery	Application, Integration, Analysis
Structural Stress & Strain Analysis Specialist	MCE204	2 / 3	Proficiency	Foundational Knowledge, Application
Advanced Manufacturing Practitioner	MCE304	3 / 6	Proficiency	Foundational Knowledge and Application
Assembly and Joining Specialist	MCE304	2 / 2	Proficiency	Application and Integration
Digital Manufacturing and Additive Innovation Expert	MCE304	1 / 2	Mastery	Integration and Learning How to Learn

6 The learner's reflections

Everything in this section was written by the learner on the platform and is quoted verbatim. Across the record period the learner submitted 49 one-sentence summaries, 36 muddiest points and 1 post comments, and marked 49 weekly posts as liked. Selection rule: for each course, the longest summary and the longest muddiest point (earliest week on a tie). Length is a transparent proxy for elaboration, not a quality judgement.

MCE106 · Calculus II Spring 2026–27

Summary · W5 · Applications of Integration: Volume by Cylindrical Shells, Arc Length, Surface Area of Revolution

"Cylindrical shells allow for finding volumes when the disk method would require solving for a variable that makes the resulting integral unsolvable."

Muddiest point · W2 · Advanced Integration Techniques: Trigonometric Integrals, Trigonometric Substitution

"The conversion back from theta to the original variable after evaluating the integral leaves me guessing on how to draw the triangle correctly every single time."

MCE108 · Engineering Graphics Spring 2026–27

Summary · W3 · Isometric and Oblique Projections

"Pictorial projections are essential for conveying the shape of a part to people who cannot read complex orthographic drawings."

Muddiest point · W7 · Threads, Fasteners, and Springs

"Distinguishing between schematic and simplified thread representations still confuses me when determining which standard is required for specific assembly drawings."

MCE202 · Dynamics Spring 2026–27

Summary · W2 · Kinematics of Rigid Bodies in 2D (Absolute and Relative Motion, Velocity Analysis)

"Translating velocity vectors between moving reference frames is the only way to track how separate parts of a mechanism interact in two dimensions."

Muddiest point · W13 · Vibrations (Undamped Free Vibrations, Damped Free Vibrations)

"My difficulty lies in the damping ratio because I cannot easily map the physical coefficient to the mathematical switch between oscillatory and decaying motion."

MCE204 · Strength of Materials Spring 2026–27

Summary · W4 · Torsion: Torsional Shear Stress, Angle of Twist, and Power Transmission

"Torsional shear stress increases linearly from the center of a shaft meaning the outer fibers take the most load during power transmission."

Muddiest point · W16 · Final Exam

"The threshold between elastic deformation and plastic collapse in combined loading cases remains shaky because I struggle to visualize the interaction of stress components."

MCE304 · Manufacturing Processes Spring 2026–27

Summary · W10 · Additive Manufacturing (3D Printing)

"Additive manufacturing allows for complex internal geometries that would be impossible to cast or machine but often struggle with anisotropic structural loads."

Muddiest point · W10 · Additive Manufacturing (3D Printing)

"The step from designing for traditional subtraction to design for additive manufacturing loses me when I try to estimate the support structure load capacity."

About this record

What it is. A summary of this learner's activity on the CoursedUp platform, generated automatically on 13 Oct 2026 from a platform data snapshot dated 13 Oct 2026. Every number is a count over platform records; every quotation is the learner's own text, unedited. No generative AI was used to produce any part of it, and no person reviewed it.

What it is not. It is not a transcript, a diploma supplement or a certificate. It contains no grades or credits, and it does not verify, certify or attest that any skill, competency or credential was attained. Sections 4 and 5 reproduce what course syllabi declare about the *design* of the courses; they say nothing about the learner's mastery. Section 3 reproduces the activities instructors recorded for their weekly posts; attendance is not tracked.

Definitions. *Weeks with a reflection*: course weeks in which the learner submitted a one-sentence summary or a muddiest point (58 of 80); comments and likes are not counted. *Reflections*: the learner's one-sentence summaries and muddiest points added together. *Learning activities*: catalogue activities in which the learner does, makes, discusses, analyses or presents something, or meets outside experts and real settings; course documents, lecture formats, platform tools, grading arrangements and standard exams or quizzes are excluded, by one classification of the platform's activity catalogue applied identically to every record. *Distinct*: counted once however many courses declare it, after normalising spelling (case, hyphens, "&"); no synonyms are merged.

Questions. About the content of a course: its instructor. About this record or the underlying data: CoursedUp support. The learner can request the full list of their submissions at any time.
